September 27, 2016

Dear USD 500 Board of Education,

Members of the National Education Association of Kansas City, Kansas are pleased to support the USD 500 Bond Issue. We believe our students and the community deserve schools that are designed for learning in the 21st century. This is another step towards moving all students into classrooms built for collaboration and cooperation which are necessary for success in our global society. It is also a necessary improvement for our community who cherish our neighborhood schools and seek to ensure children are attending school in safe, healthy schools that will help them thrive!

We urge all of our members and the Kansas City, Kansas community to vote YES on November 8!

Sincerely,

Patricia Hodison
President
National Education Association
of Kansas City, Kansas
