

Fast Facts about the J&J Vaccine

Fast Facts about the J&J Vaccine

- +** You can't compare the efficacy rates of vaccines to one another because the trials were at different times in the pandemic. **ALL** vaccines on the market will help keep you out of the hospital.
- +** The J&J Vaccine was paused out of an abundance of caution. 28 people out of 8.7 million people who have received the J&J have had serious blood clot issues. This is **0.0003%** of people who have had this vaccine. **Your chance of contracting COVID-19 is MUCH higher.**
- +** Contains **NO** fetal tissue. This is a myth, **no COVID-19 vaccines contain this.**
- +** **One and done!** This is helpful if you have a busy life!
- +** Some people may have side effects such as a sore arm, headache, body aches, fatigue, and fever. **This is NORMAL and will go away.**
